StealthStation™ S8
Navigation System

Together, we redefine navigation.

The StealthStation™ S8 brings navigation to the next level.

Intuitive. the software seems to know what you are thinking.

Proven. Based on more than 25 years of experience in surgical navigation.

Simple & fast. its procedural workflows for Neurosurgery, Spine and Trauma Surgeries and ENT enable you to focus on your main goal, providing the best in patient care.

Medtronic

INTUITIVE

Efficient, customizable procedural workflows

- Customized surgeon preferences and procedural workflows allow for a more efficient software experience
- Multi-touch enabled interactions similar to common consumer devices make the software easy to learn and easy to use
- Flexible patient registration enables you to combine both touch and trace techniques and allows you to refine your registration

PROVEN

25+ years of experience in surgical navigation

- 3.5 million patients treated
- 3rd generation of EM navigation technology provides proven accuracy for pinless procedures for cranial navigation
- Quantifiable accuracy metrics provide information on the quality of registration, giving you the confidence you expect from Stealth™

SIMPLE AND FAST

Improved performance and customizable user profiles

- Our open platform system provides compatibility with a variety of intraoperative imaging devices and implant platforms. You have the option to save your procedures and preferences for greater consistency and speed.
- Simplified patient registration automatically detects fiducials, eliminating the need to manually pick registration points, making registrations faster than other StealthStation™ solutions
- Registration options accommodate fiducial and non-fiducial based patient registration, including automatic registration with the O-arm™ Imaging System
